Fugro Pelagos Limited Hardware Liability Policy

Fugro Pelagos, Inc. shall not be liable for hardware problems related to systems that have not been supplied by Fugro Pelagos, Inc. Furthermore, Fugro Pelagos, Inc. shall assume no liability for and shall not warrant the compatibility or proper operation of hardware and software systems supplied by Fugro Pelagos, Inc. with other hardware not supplied by Fugro Pelagos, Inc.

Fugro Pelagos Software License Agreement

PLEASE CAREFULLY READ THE FOLLOWING TERMS AND CONDITIONS OF THIS LICENSE AGREEMENT ("AGREEMENT") BEFORE INSTALLING THE SOFTWARE. AS USED IN THIS AGREEMENT, "SOFTWARE" SHALL MEAN ANY PROGRAMS OR FILES INSTALLED, WHICH INCLUDES, BUT IS NOT LIMITED TO, NEW OR ORIGINAL COMPUTER PROGRAMS AND PROGRAM FILES, UPDATES, BUG FIXES, AND/OR CERTAIN DEVICE DRIVER PROGRAMS OBTAINED FROM FUGRO PELAGOS. "DOCUMENTATION" SHALL MEAN ANY USER DOCUMENTATION, INCLUDING, BUT NOT LIMITED TO, USER'S GUIDES AND MANUALS, ELECTRONIC VERSIONS OF USER'S GUIDES AND MANUALS, PRODUCT INFORMATION, AND/OR PRODUCT RELEASE NOTES. THE SOFTWARE AND ACCOMPANYING DOCUMENTATION ARE LICENSED (NOT SOLD) TO YOU BY FUGRO PELAGOS, EITHER DIRECTLY OR INDIRECTLY THROUGH AUTHORIZED RESELLERS OF FUGRO PELAGOS. YOU ASSUME RESPONSIBILITY FOR SELECTION OF THE SOFTWARE TO ACHIEVE YOUR INTENDED RESULTS AND FOR THE INSTALLATION, USE, AND RESULTS OBTAINED FROM THAT SOFTWARE.

License Grant

A. In consideration of the License fee paid to Fugro Pelagos or to an authorized Fugro Pelagos reseller, Fugro Pelagos hereby grants you, and you accept, a nonexclusive License to use the Software on a single machine or device that executes, utilizes, or displays the Software, including, but not limited to, a server, client, or x-terminal such as a hardware device or software emulator ("Machine"), owned, leased, or otherwise controlled by you, and to use the Documentation under the terms stated in this Agreement. If a Software Security Key or other similar access code card or enabling device is provided to you by Fugro Pelagos, you agree to use same solely for accessing the Software on a single Machine. Title and ownership of the Software, Documentation, and/or Security Key remain with Fugro Pelagos or its suppliers.

B. You, your employees, and/or agents are required to protect the confidentiality of the Software, Documentation, and/or Security Key (if a Security Key is provided). You may not distribute or otherwise make the Software or Documentation or Security Key available to any third party.

C. You may not de-compile, reverse engineer, modify, or copy the Software or Documentation for any purpose, except you may copy the Software into machine-readable or printed form for backup purposes in the event the Software CDs are damaged or destroyed. You may combine the Software with other software. Any portion of the Software merged into or used in conjunction with other software will continue to be the property of Fugro Pelagos and subject to the terms and conditions of this Agreement.

D. The Software and the Documentation are copyrighted by Fugro Pelagos and/or its suppliers. You agree to respect and not to remove or conceal from view any copyright, trademark, or confidentiality notices appearing on the Software and Documentation and to reproduce any such copyright, trademark, or confidentiality notices on all copies of the Software and Documentation or any portion thereof made by you as permitted hereunder and on all portions contained in or merged into other software and documentation.

E. You may not transfer said License to another party without obtaining prior written approval from Fugro Pelagos. Such transfer shall only be valid if the other party agrees in writing to accept the terms and conditions of this Agreement. If said transfer is approved, you must, at the same time, either transfer all copies (whether in printed or machine-readable form) to the same party or destroy any copies not transferred; this includes all modifications and portions of the Software contained in or merged into other software.

YOU MAY NOT USE, COPY, MODIFY, OR TRANSFER THE SOFTWARE OR DOCUMENTATION OR SECURITY KEY, OR ANY COPY, MODIFICATION, OR MERGED PORTION, IN WHOLE OR IN PART, EXCEPT AS EXPRESSLY PROVIDED FOR IN THIS AGREEMENT.

IF YOU TRANSFER POSSESSION OF ANY COPY, MODIFICATION, OR MERGED PORTION OF THE SOFTWARE OR DOCUMENTATION OR SECURITY KEY TO ANOTHER PARTY, THE LICENSE IS AUTOMATICALLY TERMINATED.

Term

This Agreement is effective upon your opening of the software package and shall continue until terminated. You may terminate this Agreement at any time by destroying the Software, Documentation, and Security Key with all copies, modifications, and merged portions in any form. It will also terminate upon conditions set forth elsewhere in this Agreement if you fail to comply with any term or condition of this Agreement. You agree upon such termination to destroy the Software, Documentation, and Security Key together with all copies, modifications, and merged portions in any form.

Limited Warranty

During the first 90 days after receipt of the Software by you, as evidenced by a copy of your receipt, invoice or other proof of purchase (the "Warranty Period") Fugro Pelagos warrants, for your benefit alone, that the CD(s) on which the Software is furnished will be free from defects in materials and workmanship under normal use. All implied warranties, including those of merchantability and fitness for a particular purpose, shall be limited to the Warranty Period. EXCEPT AS SPECIFICALLY PROVIDED ABOVE, THE WARRANTIES PROVIDED HEREIN ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SOME STATES DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO THE ABOVE EXCLUSION MAY NOT APPLY TO YOU.

FUGRO PELAGOS WILL NOT, IN ANY EVENT, BE LIABLE FOR INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OF ANY KIND OR TYPE. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL AND CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSION MAY NOT APPLY TO YOU.
THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH MAY VARY FROM JURISDICTION TO JURISDICTION OR FROM STATE TO STATE.

Fugro Pelagos does not warrant that the functions contained within the Software will meet your requirements or that the operation of the Software will be uninterrupted or error free.

Limitations of Remedies

Fugro Pelagos' and/or its supplier's entire liability and your exclusive remedies under this Agreement are as follows:

A. Fugro Pelagos shall use commercially reasonable efforts to correct any defect in the Software which is reported by you, in writing to Fugro Pelagos, during the Warranty Period provided such defect can be re-created by Fugro Pelagos in an unmodified version of the Software. However, if Fugro Pelagos is unable to correct such defect within a reasonable amount of time, you may terminate this Agreement by returning the Software, Documentation, and Security Key to the place where you obtained them or to Fugro Pelagos for either replacement or, if so elected by Fugro Pelagos, refund of the amounts paid by you under this Agreement.

B. Fugro Pelagos shall replace any CD(s) not meeting Fugro Pelagos' "Limited Warranty" and which is returned to Fugro Pelagos with a copy of your receipt, invoice, or other proof of purchase or, if Fugro Pelagos is unable to deliver a replacement CD which is free from defects in materials or workmanship, you may terminate this Agreement by returning the Software, Documentation, and Security Key to the place where you obtained them or to Fugro Pelagos for either replacement or, if so elected by Fugro Pelagos, refund of amounts paid by you under this Agreement.

IN NO EVENT WILL FUGRO PELAGOS OR ITS SUPPLIERS BE LIABLE TO YOU FOR ANY DAMAGES, INCLUDING ANY LOST PROFITS, LOST SAVINGS, OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES, ARISING OUT OF THE USE OF OR INABILITY TO USE THE SOFTWARE EVEN IF FUGRO PELAGOS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR FOR ANY CLAIM BY ANY OTHER PARTY.

SOME JURISDICTIONS DO NOT ALLOW THE LIMITATION OR EXCLUSION OF LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

U.S. Government Restricted Rights

If the Software (including accompanying Documentation and Security Key, if any) is acquired on behalf of a unit or agency of the United States government, this provision applies. This Software: (a) was developed at private expense, and no part of it was developed with government funds; (b) is a trade secret for all purposes of the Freedom of Information Act; (c) is "commercial computer software" subject to limited utilization as provided in the contract between the vendor and the governmental entity; and (d) in all respects is proprietary data belonging solely to Fugro Pelagos, Inc. For units of the Department of Defense (DOD), this Software is supplied only with "Restricted Rights" as that term is defined in the DOD Supplement to the Federal Acquisition Regulations, 252.227-7014(a)(14) and:

> Use, duplication, or disclosure by the Government is subject to restrictions as set forth in subdivision (a)(14) of the Rights in Noncommercial Computer Software and Noncommercial Computer Software Documentation clause at 252.227-7014. Contractor: Fugro Pelagos, Inc., 3574 Ruffin Road, San Diego, CA 92123.

Governmental personnel using this Software, other than under a DOD contract or GSA schedule, are hereby on notice that use of this Software is subject to restricted rights, which are the same as or similar to those specified above.

General

You may not sub-license, assign, or transfer this License or the Software or Documentation or Security Key, except as expressly provided in this Agreement, and with written approval from Fugro Pelagos. Any attempt otherwise to sub-license, assign, or transfer any of the rights, duties, or obligations hereunder is void.

YOU ACKNOWLEDGE THAT YOU HAVE READ THIS LICENSE AGREEMENT, UNDERSTAND IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS. YOU FURTHER AGREE THAT IT IS THE COMPLETE AND EXCLUSIVE STATEMENT OF THIS AGREEMENT BETWEEN YOU AND FUGRO PELAGOS, WHICH SUPERSEDES ANY PRIOR PROPOSAL, REPRESENTATION, OR UNDERSTANDING (ORAL OR WRITTEN) BETWEEN US RELATING TO THE SOFTWARE. IN ADDITION, THIS AGREEMENT SUPERSEDES ANY PRIOR PROPOSAL, REPRESENTATION, OR UNDERSTANDING (ORAL OR WRITTEN) BETWEEN YOU AND PELAGOS CORPORATION (NOW FUGRO PELAGOS, INC.)

To Manually Configure a Smart Remote 9-4
To Configure the Primary System for Network Data Output 9-6
Controlled Remote Data Configuration 9-7
Real-Time Data Source Configuration 9-7
Adding a Peripheral Device to a WinFrog Vehicle 9-7
To Add Data Generated by Peripheral Devices to a WinFrog Vehicle 9-7
Editing a Vehicle's Peripheral Devices 9-8

To Edit the Configuration of an I/O Device Once Added to a Vehicle 9-8
Deleting a Vehicle's Peripheral Device 9-9
To Remove a Device from a Vehicle's Calculations 9-9
File Data Source Configuration 9-9
To Use .raw File Data as a Position Source 9-10
Pipe Track Data Source Configuration 9-13
To Configure Touchdown Point Positioning Based on a Layback From a Reference Vehicle 9-14

Chapter 10: Eventing

Types of WinFrog Events 10-1
Automatic Events 10-1
Manual Event 10-2
Cable Events 10-3
Configuring Vehicles for Automatic Events 10-4
To Configure a Vehicle as Event Primary 10-4
To Configure a Vehicle as Event Secondary 10-4
Specifying the Event File Format 10-5
To Configure Event File Format Version 10-5
Enabling and Activating Automatic Events 10-5
To Enable Automatic Event Recording 10-5
To Configure the Event Secondary Configuration Dialog Box 10-12
To Configure the Distance Fixing Dialog Box 10-14
To Activate Data Recording 10-16
To Stop Recording Data 10-16
Manual Events 10-17
To Record a Manual Event 10-17
To Edit a Manual Event After it has been Recorded 10-18
Cable Events 10-18
To Record a Cable Event 10-19
To Edit a Cable Event After it has been Recorded 10-21
Configure Raw Data Logging 10-21
To Configure Raw Data Logging 10-22

Chapter 11: Utilities

Geo/Grid Conversion 11-2
To Convert Geographic Coordinates to Grid Coordinates 11-2
To Convert from Grid Coordinates to Geographic Coordinates 11-3
KP/Coordinate Conversion 11-4
To Convert KP Values to Geographical/Grid Coordinates 11-4
To Convert Geographical/Grid Coordinates to KP Values 11-5

Datum Transformations 11-6
To Convert Coordinates between Datums 11-6
Forward/Inverse Calculations 11-7
To Calculate the Range and Bearing from One Known Point to Another Known Point 11-7
To Calculate the Coordinates of a Point by Entering a Range and Bearing from a Known Coordinate 11-9
File Conversion Wizard 11-9
To Create a WinFrog Waypoint File 11-10
To Create a WinFrog Survey Line File 11-13
To Create a User-Defined File 11-13
Export Events to Excel 11-13
To Create a WinFrog Waypoint File 11-13
LOP/Position Calculation 11-14
To Export Events to Excel 11-15
Acoustic Utilities 11-22
Import LBL Cal File (*.MDB) 11-23
Fusion Data 11-23
Using the Utility 11-27
Processing a Converted File 11-28
Map Wizard 11-29
To Create a BMM map file 11-29
Plotter Base Map Wizard 11-34
To Add The Plotter to WinFrog 11-34
To Generate a New Base Map 11-34
To Register an Existing Map and Plot to it in Real Time 11-38
Generate DXF Map 11-42
To Create a .DXF Format Map 11-42
Map Parameters Dialog Box 11-44
Select Grids Dialog Box 11-45
Select Data Dialog Box 11-47
Select RAW Data Dialog Box 11-49
To Plot Raw Positional Data in the DXF Map 11-49
Generate MGD77 File 11-51
File Formats 11-51
Header Page Buttons 11-53
Time Period Data 11-57
Time Conversion 11-57
To Convert DOS Time to ASCII Time 11-57

To Convert ASCII Time to DOS Time: 11-58
Position Averaging 11-58
Recording 11-58
To Record Fixes and Compute a Mean Position 11-59
To Load Data from Files 11-60
To Calculate and View the Position Data 11-62
To Edit and Re-Calculate Average Position Data 11-63
To Print and Save Average Position Data 11-64
Loading Single AEP Files 11-64
Import Bathymetry 11-64

Chapter 12: Simulator

Simulated Devices 12-1
To Set the Vehicle Data Source to Simulated 12-1
To Add a Simulated Real-Time Device 12-2
To "Generically" Configure a Simulated Device 12-2
To Configure the Simulated GPS Device 12-3
To Configure the Simulated USBL Device 12-3
To Configure the Plow Simulator 12-4
To Configure the Simulated Counter 12-5
To Configure the Simulated Attitude Sensor 12-6
To Add a Simulated Real-time Device to a Vehicle 12-6
To Configure a Simulated Real-time Device for a Specific Vehicle 12-7
Controlling Simulated Devices 12-8
Controlling the Simulated Devices Via The Toolbar Buttons 12-8
To Configure the Toolbar Button Controls 12-8
Toolbar Simulator Controls 12-9
To Use the Toolbar Simulator Control Buttons 12-9

Chapter 13: Positioning Using Range/Range Devices

Working Control Station File 13-1
Range/Range Devices 13-2
To Add a Range/Range Peripheral I/O Device 13-2
To Add a Range/Range I/O Device to a Vehicle 13-2
Configuration of a Range/Range Device 13-3
To Configure the Range/Range Device 13-3
To Add a Station to the Solution 13-5
To Remove a Station from the Solution 13-5
Editing Range Use in the Solution 13-5
To Monitor Range/Range Data in the Calculations Window 13-6

Chapter 14: Controlled Remote Tug Telemetry

Overview 14-1
Security 14-3
Remote Sites 14-4
WinFrog with the Controlled Remote Tug Telemetry Module versus the WinFrog Remote Package 14-4
Remote Control with Telemetry versus TCP/IP Network 14-4
Configuring a Remote Site 14-4
To Configure a Remote Site 14-4
Remote Site Operation 14-7
Control Sites 14-8
Operation Overview 14-8
The Controlled Remote Window 14-8
To Add and Configure a Controlled Remote in the Controller's Vehicle List 14-9
To Connect to a Remote 14-11
To Disconnect from a Remote 14-14
To Configure the Vehicle List for the Remote 14-15
To Display the Remote Graphics at the Controller 14-17
To Send a Working File to the Remote 14-18
To Force an Update of the Configuration of the Vehicles on the Remote's Vehicle List 14-19
To Interrogate the Remote Vehicle Data Type List and Configuration 14-19
To Query the Remote Vehicle and System for Configurations 14-20
To Set the Remote's Data Transmission Rate 14-20
Monitoring and Configuring the Remote Vehicle and Graphics 14-21
To Configure the Remote from the Controlled Remote Window 14-22
To Interrogate the Remote from the Controlled Remote Window 14-23
Remote Control and Anchor Handling Operations 14-36
Operating Restrictions 14-36

Chapter 15: USBL Acoustics

Overview 15-2
Components 15-2
The Data 15-2
Application 15-3
Attitude Data and Offsets for the Hydrophone 15-3
Attitude Data and Offsets for the Beacon 15-4
USBL Data Types 15-4
General USBL Setup 15-5
To Add the USBL Device to WinFrog 15-5
To Generically Configure a USBL Device in WinFrog 15-5

To Attach and Configure the USBL HYDROPHONE Data Type 15-6
To Attach and Configure the BEACON Data Type 15-11
To Attach and Configure the ATTITUDE Data Type 15-15
To Attach and Configure the HEADING Data Type 15-16
To Monitor the HYDROPHONE Data Type 15-18
To Monitor the BEACON Data Type 15-18
Specific USBL Setups 15-21
To Configure for Positioning the Hydrophone Vehicle 15-21
To Configure for Only Tracking the Beacon Vehicle 15-22
To Configure for Relative USBL Beacon Positioning for a Vehicle 15-23
To Configure for Ray Bending 15-24

Chapter 16: USBL Calibration

USBL Calibration 16-1
USBL Calibration Preparation 16-2
Key Points to Review Prior to USBL Calibration 16-2
The Acoustic Calibration Dialog for Data Collection 16-3
To Access the Acoustic Calibration Dialog 16-3
USBL Calibration Data Collection 16-8
To Configure the Transducer Settings 16-14
To Collect USBL Calibration Data 16-15
To Save Calibration Data to File 16-16
USBL Calibration Data Editing 16-17
To View USBL Calibration Data for Editing 16-17
USBL Calibration Processing 16-28
To Setup for the Determination of the Beacon Position 16-30
To Perform the Adjustment 16-37
Viewing the USBL Solution Statistics 16-46
USBL Calibration Reporting 16-50
Recalculation of the USBL Data 16-54
Reset the USBL Calibration Data 16-55
Updating the USBL Calibration 16-56
To Update the USBL Calibration Data in WinFrog 16-56
Confirmation Tests 16-57
To Confirm the USBL Calibration Results 16-57
Summary of the USBL Calibration Process 16-58

Chapter 17: Special Applications

Speed Log and Inertial Devices 17-1
General Kalman Filtering 17-1
Gyro Requirements 17-2

Adding the INS to WinFrog and the Vehicle 17-2
To Add the INS Device 17-2
Configuring the INS Data Type 17-3
Associated Configurations 17-4
Monitoring the Application of the INS 17-7
To Monitor Use of the INS Data Type as Attached to the Vehicle 17-7
To Monitor the Impact of the INS Data Type 17-8
To Reset the Vehicle's Position 17-9
Calibrating the INS Data Type 17-10
Pipe Bundle Tow Monitoring 17-13
The Pipe Bundle Traverse 17-14
Adding and Configuring the Device 17-14
Configuring the Pipe Bundle Vehicle 17-16
Viewing the Pipe Bundle Vehicle 17-21

Chapter 18: Basic Ribbit

Introduction 18-1
An Overview of Ribbit 18-2
Start Up 18-2
Status Window 18-2
Audit Trail "Notepad" 18-3
Menu Items 18-3
Data Input 18-5
Raw (.Raw) Files 18-5
Loading Raw (.Raw) Data Files 18-6
To Load WinFrog Raw (.raw) Files 18-6
To Manually Select .Raw Files 18-7
To Select .Raw Files by Time 18-7
Data (.Dat, .Rcv, .Src) Files 18-8
To Load .Dat, .Rcv and .Src Data Files 18-9
Manual Event (.Log) Files 18-9
To Load Manual Event (.Log) Files 18-9
XYZ Data 18-9
Loading Tide Files 18-11
ASCII Files 18-11
To Load an ASCII Tide File 18-11
World Tide (.Tab) Files 18-12
To Load a World Tide (.Tab) File 18-12
NOAA Tide Files 18-12

To Load a NOAA (.Tid) Tide File 18-12
MS Access (.Mdb) Data..... 18-14
To Load an MS Access (.Mdb) File..... 18-14
Tools..... 18-14
Data Operations 18-14
To Perform Data Operations..... 18-14
Merging / Deskewing 18-16
To Merge Data Items 18-16
Interpolation 18-17
To Interpolate Data 18-18
Apply Corrections..... 18-19
To Apply a Correction to a Data Item..... 18-19
Filtering & Thinning 18-20
To Thin Out a Data Item..... 18-20
To Filter a Data Item 18-21
To Apply a Gate Filter to a Data Item 18-22
To Apply a Mean Filter to a Data Item 18-22
To Apply a Median Filter to a Data Item 18-23
To Apply a Central Tendency Filter 18-24
Configure/Transform Geodetics 18-24
To Change a Data Item's Geodetics..... 18-24
Apply Offsets..... 18-25
To Apply a Horizontal Offset to a Positional Data Item..... 18-26
Overplot Removal 18-26
To Apply Overplot Removal to a Three Dimensional Data Item 18-27
Interactive Data Editor..... 18-27
To Edit a Data Item using the Interactive Data Editor..... 18-28
Spreadsheet Editor 18-29
To Edit a Data Item Using the Spreadsheet Editor 18-29
Data Output..... 18-31
ASCII File Output..... 18-31
To Output Data as ASCII Text 18-31
DXF File Output..... 18-33
To Create a DXF Chart 18-33
DXF File Output Font Options..... 18-40
MS AccessTM .MDB File Output..... 18-40
To Output Data to a .MDB File..... 18-40

Tutorial: Simulated Bathymetric Survey

Procedural Steps **T-1**

Sample Project **T-2**

First Steps **T-3**

Geodetics **T-3**

To Configure Geodetics T-3

Units of Measure **T-6**

To Configure Units of Measure T-6

Working Directories **T-8**

Working Files **T-9**

To Define the Working Files T-9

I/O Devices (Peripheral Devices) **T-11**

To Add Peripheral Devices to WinFrog T-11

Viewing the I/O Device Data **T-13**

To View the I/O Devices Window T-13

Configure the Vehicle **T-15**

To Configure a Vehicle T-15

Vehicle Dimensions **T-17**

To Configure a Vehicle's Dimensions T-17

Defining the Vehicle's Data Source and Devices **T-18**

To Define the Vehicle's Data Source T-18

Vehicle Tracking Offsets **T-23**

Vehicle Text Window **T-25**

To Display the Vehicle Text window T-25

To Configure the Vehicle Text Window T-25

Graphics Window/Display **T-26**

To Display the Graphics Window T-27

To Configure a Graphics Window T-27

Graphics Display Zooming **T-29**

To Zoom Out T-29

To Zoom In T-29

Vehicle Navigation in Simulation Mode **T-29**

To Change the Position of the Vehicle T-29

To Change a Vehicle's Position Using the Display Position Feature T-30

Driving the Vehicle in Simulation Mode **T-30**

To Configure the Simulator T-30

To Drive the Vehicle in Simulation Mode T-31

Survey Lines and Waypoints T-31
Survey Lines T-32
To Create New Survey Lines T-32
To Create Survey Lines Parallel to an Existing Survey Line T-34
Waypoints T-35
To Create New Waypoints T-36
Tracking a Waypoint T-37
To Track a Waypoint T-37
Collecting Data: Events T-38
Automatic Eventing T-39
Raw Data T-39
Manual Fixing T-40
Configuring a Vehicle for Automatic Events T-41
To Define the Event Primary Vehicle T-42
Configuring Automatic Events T-42
To Configure Automatic Events T-43
Eventing is Active T-46
Tracking up the Screen T-46
To Change the Rotation of the Graphics Display T-47
Attitude T-47
To View the Attitude Display T-47
Starting to Record Automatic Events with Autostart T-48
To Record Automatic Events with Autostart Activated T-48
Stopping/Re-starting Eventing T-48
To Stop Eventing T-48
To Re-start Eventing T-48
Checking the Survey Data T-49
To Check the Recorded (.DAT) Data T-49
To Check the Raw (.RAW) Data T-49
Completing the Survey T-50

Optional Extension Module Chapters:

Chapter EM1: GPS Calculations

Pseudorange Positioning EM1-1

Differential GPS (DGPS) EM1-3

RTCM Data EM1-3

DGPS Solutions in WinFrog EM1-3

To Configure GPS Calculations EM1-4

To Add a GPS Device to WinFrog EM1-4

To Generically Configure a GPS Device EM1-5

To Add a GPS Device's Data Items to a WinFrog Vehicle's Devices List EM1-6

To Configure a GPS Device for a Vehicle Using GPS Calcs Module EM1-6

To Configure the Phase Smoothing Filter EM1-11

Applying RTCM Corrections to WinFrog Pseudorange Position Calculations EM1-13

To Add RTCM Device(s) to WinFrog EM1-13

To Add an RTCM Device to a Vehicle's Device List EM1-14

To Configure an RTCM Device in a Vehicle's Device List for use with the GPS Calcs Module EM1-14

To Enable/Remove an RTCM Source in WinFrog's Pseudorange Calculations EM1-16

Alarms EM1-17

To Configure Alarms EM1-19

UKOOA Statistical Testing EM1-20

w-Test EM1-20

F-Test EM1-21

To Configure Statistical Tests EM1-21

Monitoring of Statistical Tests EM1-22

To Display the Results of the Statistical Testing EM1-22

GPS Pod Positioning EM1-22

To Track a GPS Pod in WinFrog EM1-22

GPS Calculation Displays EM1-24

To View Pseudorange Calculation Data EM1-24

Multi-Ref Summary Page EM1-26

Individual Reference Station Display Page(s) EM1-26

To Display Pseudorange Calculation Results in the Calculations Window EM1-26

To Display Pseudorange Calculation Data in the Calculations Window EM1-29

To Display Pseudorange Calculation Statistics in the Calculations Window EM1-32

Reference Station Integrity Monitoring (RSIM) Features EM1-34
Reference Station Configurations EM1-34
Single Reference Station Component Configuration..... EM1-36
To Configure a GPS Receiver for DGPS Positioning EM1-36
Use of RSIM at the Remote Station EM1-40
To Configure a Remote Station to Use RTCM/ RSIM Data.....EM1-42
To Turn on the Audible and Visual Alarms EM1-43

Chapter EM2: Multi-Vehicle Positioning and Telemetry

Network Functionality EM2-1
Token Ring Network EM2-2
Point-to-Point Network EM2-3
Data Packet Types EM2-3
Telemetry Setup.....EM2-4
To Add the Telemetry Device.....EM2-4
To Configure the Telemetry Device EM2-6
I/O Devices Dialog Box.....EM2-13
To Toggle Between Standard Telemetry and RTCM Displays.....EM2-14
Transmitting/Receiving Positions EM2-16
To Configure WinFrog to Transmit Position Information.....EM2-16
To Configure WinFrog to Receive a Position.....EM2-17
Transmitting/Receiving Targets EM2-17
To Configure WinFrog to Transmit a Target Position EM2-18
To Configure WinFrog to Receive a Target Position EM2-19
Transmitting/Receiving RTCM Corrections EM2-19
To Configure WinFrog to Transmit RTCM Corrections.....EM2-19
To Configure a WinFrog Station to Receive and Apply RTCM Corrections.....EM2-21
File Transfer.....EM2-21
To Send a File via Telemetry EM2-21
Receiving a File.....EM2-24
To Change the WinFrog Telemetry Directory EM2-24

Chapter EM3a: LBL Acoustics

Overview EM3a-1
Components EM3a-1
The Data..... EM3a-2
Fixed Transponder Arrays and the Working Xponder File... EM3a-2
Non-Fixed Transponders and the Working Xponder File..... EM3a-3
Inverted LBL and the Working Xponder File EM3a-3

Velocity Files **EM3a-3**
Operational Modes **EM3a-4**
Data Items **EM3a-5**
Standard LBL Setup **EM3a-6**
To Add the LBL Device to WinFrog EM3a-6
To Configure the LBL Device EM3a-7
To Attach and Configure the LBL TRANSCEIVER Data Item EM3a-7
To Attach and Configure the XPONDER Data Item EM3a-15
To Attach and Configure the FIXED XPONDER Data Item EM3a-26
To Attach and Configure the ELEVATION Data Item EM3a-29
To Attach and Configure the ATTITUDE Data Item EM3a-30
Differential Depth Operation **EM3a-33**
To Implement the Differential Depth for Standard Simultaneous Positioning Operations EM3a-33
To Implement the Differential Depth for CRP Depth from Other Source Positioning Operations EM3a-33
To Implement the Differential Depth for Monitoring Depth/Attitude Operations EM3a-35
Monitoring the Standard LBL and Differential Depth Operations **EM3a-36**
To Monitor LBL Operations in the Calculation Window EM3a-36
Using the LBL Data Items Calculation Window for XPONDER and LBL TRANSCEIVER **EM3a-36**
Using the LBL Data Items Calculation Window for XPONDER, Depth and Attitude Only **EM3a-41**
Using the LBL Data Items Calculation Window for FIXED XPONDER **EM3a-43**
Inverted LBL Application **EM3a-44**
Overview **EM3a-44**
Adding the INVERTED LBL Device EM3a-45
Attaching Data items to the Vehicle **EM3a-47**
To Monitor INVERTED LBL Operations in the Calculation Window EM3a-57
Understanding and Using the INVERTED LBL Data Items Calculation Window **EM3a-57**
Editing an LBL LOP **EM3a-65**
Edit LBL Range **EM3a-65**

Chapter EM3b: LBL Calibration

LBL Calibration **EM3b-1**
LBL Transponder Array Design **EM3b-2**
LBL Transponder Deployment **EM3b-2**

LBL Calibration Preparation EM3b-3
LBL Calibration Data Collection EM3b-4
To Access the Acoustic Calibration Dialog EM3b-4
To Initiate Data Collection of Surface Range Data EM3b-13
LBL Calibration Data Editing EM3b-19
To evaluate the residuals to detect bad data EM3b-40
How WinFrog Bins the Data EM3b-41
LBL Calibration Calculations EM3b-43
To Setup the LBL Calibration Solution EM3b-45
To Enter Constraints for the Least Squares Adjustment EM3b-49
To Calculate the LBL Calibration Solution EM3b-51
Viewing the LBL Solution Statistics EM3b-57
Editing Calibration Station Information EM3b-60
To Edit a Calibration Base Station EM3b-61
To Remove a Calibration Base Station EM3b-62
To Edit a Working Xponder File Station EM3b-62
To Add a Working Xponder File Station EM3b-63
To Update a Calibration Base Station EM3b-64
To Complete the Base Station Editing EM3b-64
LBL Calibration Report EM3b-65
To Print an LBL Calibration Report EM3b-65
Recalculate LBL Data EM3b-70
Summary of the LBL Calibration Process EM3b-73

Chapter EM4: Multibeam Logging and Display

Devices EM4-2
To Add and Configure POSMV (BINARY- UDP) Device EM4-3
To Add and Configure POSMV (BINARY- TCP) Device EM4-4
To Add and Configure Reson 81xx Device EM4-4
To Add and Configure Reson 7125 Device EM4-4
Working Directory EM4-5
To Configure the XTF Directory EM4-5
Data Logging EM4-7
To Configure XTF/S7K Logging EM4-7
Coverage Map EM4-10
To Create a Coverage Map EM4-10
To Open a MBES QC Window EM4-17
To Load a Coverage Map EM4-17
To Load Additional Coverage Maps EM4-17
To Edit Coverage Map EM4-18

To Close Coverage Map....EM4-18
QC Window....EM4-19
QC Setup Dialog....EM4-21
Graphics Window Options....EM4-22
Multibeam Operation....EM4-23
Patch Test....EM4-24
Acquisition - Patch Test Procedure....EM4-24
Navigation Latency Processing Procedure....EM4-29
