

The chart displays current speed in knots over a seven-day period. A red vertical line marks the 'now' position on Friday, March 31st. The current speed fluctuates between approximately 0.8 and 1.5 kts. The x-axis is labeled with local time from Friday, March 31st to Thursday, April 6th. The y-axis is labeled 'Current Speed, kts' and ranges from 0 to 2. Arrows at the top of the chart indicate wind direction.
